

EVERGREENS

TOPIARIES

Poodle Topiary

2-ball & 3-ball upright; each ball graduated in size; annual maintenance necessary to maintain shape; juniper

Pom Pon Topiary

multiple poms; width and height varies per plant; blue and green varieties; annual maintenance necessary to maintain shape; juniper

Spiral Topiary

pruned in deep spiral shape; annual maintenance necessary to maintain shape

ABIES

A. concolor

White Fir

(35-40') width half of height, pyramidal shape; short needled; tolerant of drought; a majestic evergreen; full sun

CHAMAECYPARIS

C. pisifera

Goldmop Cypress

(3') dwarf mounded shrub, slow growing; delicate appearance; thread-like branches have golden yellow color when planted in full sun

JUNIPERUS_{spreading}

J. chinensis

Gold Coast Juniper

(4-6' high x 6-7' wide) green foliage; new growth is bright yellow

J. chinensis

Hetzi Blue Juniper

(5-6' high x 5-6' wide) bright minty green foliage

J. chinensis

Seagreen Juniper

(4-5' high x 5-6' wide) bright minty green foliage

J. chinensis

Compact Pfitzer Juniper

(24" high x 5-6' wide) light grey-green foliage

J. chinensis

Green Sargent Juniper

(18-24" high x 5-6' wide) bright green summer and winter

J. horizontalis

Andorra Juniper

(18-24" high x 7-8' wide) also called 'Youngstown'; grey-green foliage in summer, purple in winter

J. horizontalis

Bar Harbor Juniper

(10-12" high x 6-7' wide) blue-green in summer, silvery plum in winter

J. horizontalis

Blue Rug Juniper

(4-6" high x 7-8' wide) light blue foliage, purple tint in winter

J. horizontalis

Hughes Juniper

(15" high x 6-8' wide) silver-blue foliage, purple in winter

J. procumbens nana

Procumbens Juniper

(12-15" high x 6-7' wide) blue-green foliage

J. sabina

Broadmoor Juniper

(12-15" x 4-5') grey-green foliage

J. sabina

Buffalo Juniper

(12-15" x 3-5') medium green

J. sabina

Calgary Carpet Juniper

(6-8" high x 7-8' wide) soft green foliage

J. squamata

Blue Star Juniper

(2-3' high x 3-4' wide) mounded habit; rich silver blue foliage

JUNIPERUS upright

J. chinensis

'Hetzi Columnaris'

Fairview Juniper

(15' x 5') dense and pyramidal, bright green foliage

J. chinensis

Keteleeri Juniper

(15-20' x 6-7') broadly pyramidal, medium green foliage

J. chinensis

Mountbatten Juniper

(8-12' x 4-6') narrow, pyramidal; bright green needles

J. scopulorum

Pathfinder Juniper

(20' x 6-8') narrow, pyramidal; blue-grey foliage; excellent cold tolerance

J. virginiana

Burki Juniper

(15-20' x 5') pyramidal habit; blue tinted foliage

MICROBIOTA

M. decussata

Russian Arborvitae

(12" x 3-4') also called Russian Cypress; dwarf and densely branched; graceful form; bright green color turns bronze in winter; use in full sun to full shade

PICEA

P. abies

Norway Spruce

(40-50' x 20-25') bright green color; broadly pyramidal habit; medium growth rate

P. abies nidiformis

Birdsnest Spruce

(4' x 6-7') distinctive plant for accent use; slow growing, flat topped; stiffly branched; use in full sun

P. glauca 'Conica'

Dwarf Alberta Spruce

(6-7') slow growing dwarf, very short needles; pruning necessary only for shaping

P. glauca 'Densata'

Black Hills Spruce

(20-25' x 10-12') bright green needles mature to blue-green in color; dense symmetrical cone shape; full sun and slow growing

P. pungens

Colorado Spruce

(50-60' x 20-30') ranges of green to blue-green in color; pyramidal in habit; needs moist, well drained soil

P. pungens glauca

Colorado Blue

Spruce

(50-60' x 20-30') cultivated for color; bright silvery blue needles; pyramidal habit

PICEA *continued*

P. pungens glauca

Fat Albert Spruce

(30' x 15') aptly named spruce; dense needles extremely silver-blue

P. pungens glauca

Hoopsi Spruce

(50' x 20') dense, spreading pyramidal form with intense silver blue needles; considered one of the best

P. pungens glauca 'Globosa'

Globe Blue Spruce

A beautiful, rounded evergreen of intense blue color; grown as low specimen or tree form on standard. Both forms are sold at the same price.

PINUS

P. mugho mughus ENCI strain

Mugho Pine

(3-6') compact, very round plant; medium growth rate; uniform and easily maintained; best in full sun, light shade acceptable

P. nigra

Austrian Pine

(55-60' x 20-40') broadly pyramidal; stiff horizontal branching; long needles, vigorous and dense; a substantial element in the landscape

P. strobus

White Pine

(50-70') long bright green needles on pliant branches; softer and more graceful than other pines; fast growing; excellent decorative cones

PSEUDOTSUGA

P. menziesii

Douglas Fir

(70-90' x 30') dark bluish-green foliage, short needled; stately pyramidal habit; grows rapidly; prefers relatively dry locations

TAXUS

T. cuspidata

Capitata Yew

(25-35') rich, dark green foliage is short and pliant; slow growing; pyramidal habit; shears well; sun or semi-shade acceptable; popular for specimen use, hedging and screening

T. media

Browni Yew

(4-5') globe form with medium green foliage; shapely and compact, shears well; use in sun or semi-shade

T. media

Densiformis Yew

(4-6') wide spreading; dense medium green foliage; shears well; sun or semi-shade

T. media

Everlow Yew

(3') low-growing and wide spreading; bright glossy green foliage; sun or semi-shade

T. media

Hicksi Yew

(10-12') upright columnar; dark green foliage, often producing bright red berries in small quantities; very adaptable for hedging; sun or semi-shade

T. media

Tauntoni Yew

(3') slow growing, spreading; light green foliage; extremely hardy; use in sun or semi-shade

T. media

Wardi Yew

(3-4') lower form and slower growing than other spreading varieties; arching branches have short stiff needles; sun or semi-shade

THUJA

T. occidentalis

Emerald Green

Arborvitae

(15-20') upright columnar form; dense bright green foliage in all seasons; medium growth rate

T. occidentalis

Nigra Arborvitae

(20-25') darkest green color holding well through winter; upright columnar form

T. occidentalis

Techny Arborvitae

(15-20') also called 'Mission'; upright columnar form, dark blue-green foliage in all seasons; slow to medium growth

T. occidentalis

Hetz Midget

Arborvitae

(2' x 2-3') globe form; green; very slow growing; retains globe form

T. occidentalis

Woodward Arborvitae

(4-5') globe; dense habit; retains wide rounded form; medium green foliage; sun to part shade

TSUGA

T. canadensis

Canadian Hemlock

(30-40' x 15-25') pyramidal habit; dark green drooping branches; full sun to shade
